

## **COMBINATION CONNECTOR SHELL**

### **ABSTRACT OF THE DISCLOSURE**

A combination connector shell is constructed to include an  
5 electrically insulative front housing adapted to hold first terminals,  
the front housing having two springy hooks and LED insertion slot,  
an open frame type rear housing, the rear housing having two front  
hooks detachably hooked up with the springy hooks of the front  
housing and two bottom hooks, and a terminal holder adapted to  
10 hold a circuit board in the rear housing and a set of second  
terminals, the terminal holder having two hook holes respectively  
engaged with the bottom hooks of the rear housing.
